WASTE MANAGEMENT & RECYCLING DIRECTORY

REGIONAL MUNICIPALITY
OF HAMILTON - WENTWORTH
WASTE MANAGEMENT &
RECYCLING DIRECTORY

REGIONAL CHAIRMAN'S MESSAGE

Environmental awareness within the Region continues to be an important concern as we work together globally and locally for a cleaner, healthier environment.

We at the Region advocate environmental responsibility and have developed several programs to encourage local industries, businesses and institutions to seek better alternatives to the traditional methods of waste disposal.

References such as the Waste Management and Recycling Directory have been compiled to further promote the 3Rs of waste management - Reduce, Reuse and Recycle.

We believe that with continued cooperation between the Region and our industrial, commercial and institutional community, waste will be more effectively managed, making Hamilton-Wentworth a cleaner place in which to live, work and play.

Sincerely,

Terry Cooke
Regional Chairman

REGIONAL MUNICIPALITY
OF HAMILTON - WENTWORTH
WASTE MANAGEMENT &
RECYCLING DIRECTORY

MARCH 1995

INTRODUCTION

Caring for the environment has prompted both the public and private sectors to explore new and improved ways of managing and recycling waste. Waste within the Region of Hamilton-Wentworth is generated from industrial, commercial, institutional, agricultural and residential areas.

The purpose of this directory is to:

- assist the industrial, commercial and institutional (IC&I), community with its waste reduction & recycling needs
- promote existing services and the development of new markets within the vicinity of the Region of Hamilton-Wentworth
- reduce material going to landfill and incineration for re-introduction back into the market place
- promote and encourage awareness of present and future environmental concerns
- assist the IC&I community meeting the waste diversion goals of 25% by 1992 and 50% by the year 2000 set by the Ministry of the Environment

Every effort has been made to include all companies and businesses involved in waste management and recycling in the Region of Hamilton-Wentworth and surrounding areas. We welcome any suggestions to make our information more complete.

The Region's Environmental Services Department does not warrant that any companies or businesses listed will serve your needs or deal with your companies concerns satisfactorily. Businesses are advised to make your own inquiries and arrangements with the companies or businesses directly.

The Environmental Services Department are also available upon request to provide your company with a detailed waste assessment. This assessment can provide you with a better understanding of the waste materials you have, and in turn allow us to make alternative suggestions for their disposal (recycling).

For further information on this project or any matter dealing with solid or liquid waste, please contact the staff of the Region's Environmental Services Department at (416) 546-4417 (IC&I Hotline).

REGIONAL MUNICIPALITY OF HAMILTON - WENTWORTH WASTE MANAGEMENT & RECYCLING DIRECTORY

ENVIRONMENTAL SERVICES
WASTE MANAGEMENT DIVISION
GENERAL INFORMATION

THIS SUMMARY IS PROVIDED FOR GENERAL INFORMATION ONLY. DETAILED INFORMATION CAN BE OBTAINED BY REFERRING TO THE REGIONAL SOLID WASTE BY-LAW #R80-098, OR BY CONTACTING THE SOLID WASTE MANAGEMENT SECTION'S SOLID WASTE HOTLINE AT 546-4417.

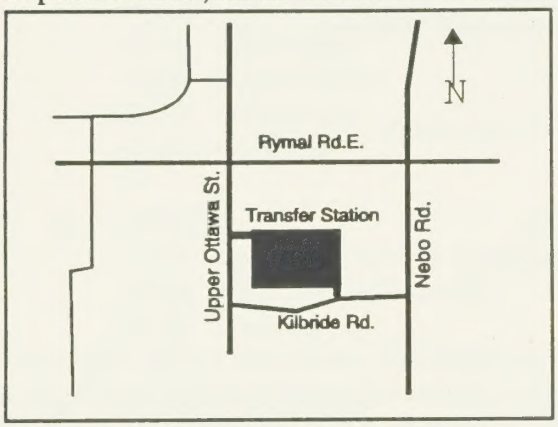
GARBAGE COLLECTION SERVICE

Household garbage collection in the Region of Hamilton-Wentworth is performed by each Area Municipality or its contractor. For inquiries concerning curbside garbage pick-up contact your Municipality:

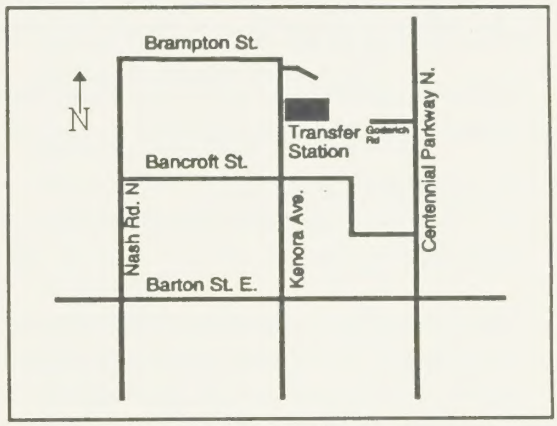
Ancaster	648-4401	Hamilton	546-2785	Dundas	628-6327
Stoney Creek	643-1261	Glanbrook	679-4121	Flamborough	689-7351

REGIONAL DISPOSAL FACILITIES

The Region no longer operates dumps which are open to the public. Instead, garbage may be taken to the Region's disposal facilities, called "TRANSFER STATIONS". The Transfer Stations are located at:



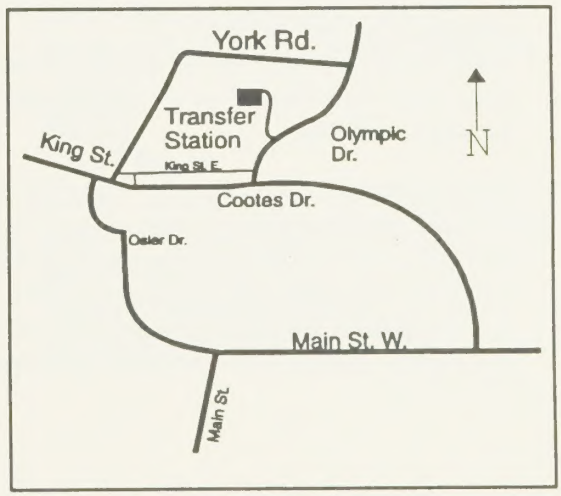
Mountain Transfer Station
Hamilton Mountain



Kenora Transfer Station
East Hamilton

**** HOURS OF OPERATION ****

8:00 a.m. to 6:00 p.m. Mon.- Sat.
Closed: Sundays, Christmas Day,
New Years Day and Good Friday.



Dundas Transfer Station
Dundas

ACCEPTABLE SOLID WASTE

**** All loads must be tarped. ****

General residential, commercial, industrial and municipal refuse originating from the Hamilton-Wentworth Region, including kitchen waste, appliances, four car tires per day per resident, general trash, furniture, glassware, clothing, sweepings, tree clippings, crates, approved industrial by-products (in limited amounts), and most articles under four feet in length.

Cont'd...

NON-ACCEPTABLE WASTE
Construction and demolition debris (ie. drywall and shingles), earth fill, broken concrete, and other inert materials, asphalt, tree stumps, construction timber, tires from industrial/commercial generators, wood products over four feet in length, bundles of metal strapping, and the like, abandoned motor vehicles, metal drums or barrels, agricultural waste, dead animals, liquid waste, untreated sewage, and hazardous waste as defined in RSO 1970, 824 as amended, pathological waste, pesticides and herbicides, snow, recyclable corrugated cardboard from industrial/commercial generators and other waste materials which may be deemed by the Commissioner of Transportation/Environmental Services to be "Non-Acceptable".

COVERING LOADS
All solid waste conveyed to the Facilities shall be contained in fully enclosed vehicle bodies, or totally enclosed or covered in canvas, tarpaulins or nets, or other acceptable cover which is properly secured.

DEAD ANIMALS
Contact the local S.P.C.A. or a local rendering company

LIQUID WASTE
Refer to the "Liquid Waste Removal" Section in the Yellow Pages of the Bell Canada Directory- (or call Regional Offices of the Ministry of the Environment at 521-7640).

SEPTIC WASTE
Septic Waste generated from recreational vehicles may be discharged at the Mountain Transfer Station or the Woodward Avenue Sewage Treatment Plant. A charge of $5.00 applies, GST included.

INDUSTRIAL/COMMERCIAL DISPOSAL & RECYCLING
Contact the Region at 546-4439 to find out about existing markets for your wastes.

RADIOACTIVE WASTE
Contact the local branch of the Ministry of the Environment 521-7640.
(Smoke detectors are not classified as radioactive waste and can be disposed in regular garbage).

RECYCLABLES (BLUE BOX) COLLECTION SERVICE
Recyclables (newspaper, glass bottles and jars, food and beverage cans, 2 litre PET plastic pop bottles, aluminum pie plates, plastic bottles and jugs, telephone books, glossy magazines, clean grocery bags and corrugated cardboard) are processed in Hamilton-Wentworth Region by Third Sector Recycling. For inquiries concerning pick-up of Blue Box materials in Ancaster, Dundas, Flamborough, Hamilton and Stoney Creek, contact Third Sector at 545-4480. In Glanbrook, contact Egger Excavating at (416) 774-3789. Blue boxes may be obtained by contacting the Recycling Hotline at 546-2157.

RECYCLING DEPOTS
Blue box recyclables may be brought to any Transfer Station, during regular operating hours, and deposited in the blue bins. Third Sector at 1519 Burlington Street East also accepts recyclables between 9:00 a.m. and 5:00 p.m., Monday to Friday.

HOUSEHOLD HAZARDOUS WASTE DEPOT (H.H.W Depot)
The H.H.W. Depot is a service open to residents of the Region. The Depot is open every Saturday from 9am-5pm, and is located at 239 Lottridge St. N. in Hamilton. The Depot accepts wastes such as used motor oils, old paints, pesticides, batteries and propane cylinders. Asbestos is also accepted by special arrangement with Hotz Environmental (527-9266). Radioactive waste, biological wastes, PCBs, explosives and ammunition are not accepted at the depot. Commercial/industrial generators do not qualify for this free service.

Waste Section and Sub Category — General Category

10 CONSTRUCTION & DEMOLITION DEBRIS
- 10.10 Asphalt & Concrete
- 10.20 Drywall
- 10.30 Asphalt Shingles

20 ORGANIC WASTE (FOOD AND VEGETATION)
- 20.10 Food - General
- 20.20 Food - Edible Surplus Disposal
- 20.30 Composting
- 20.40 Grease Trap Waste/Servicing

30 GLASS, CERAMICS, REFRACTORIES
- 30.10 Bottle Glass
- 30.20 Glass-General
- 30.30 Refractories
- 30.40 Ceramics

40 METAL
- 40.10 Metal Scrap
- 40.20 Metal Sludge/Solutions
- 40.30 Batteries

50 OILS/COOLANTS
- 50.10 Waste Oil
- 50.20 Coolants/Glycols
- 50.30 Oil Filters

60 CHEMICALS
- 60.10 Solvents & Paints
- 60.20 Inks
- 60.30 Organic/Inorganic Chemicals
- 60.40 Refrigerants and Containers

70 PAPER
- 70.10 Paper Products/Cardboard
- 70.20 Fine Paper

80 BIOMEDICAL
- 80.10 Biomedical Waste Removal

Waste Section and Sub Category — General Category

90 PLASTICS
- 90.10 Plastic Scrap
- 90.20 Tires & Rubber

The waste products generated from construction and demolition industries are diverse in nature and quite plentiful. A general definition of C & D debris is:

> *"uncontaminated solid waste resulting from the construction, remodelling, repair and demolition of structures and roads, with such waste including bricks, concrete, soils, rock, wood, wall coverings, plaster, drywall, plumbing fixtures, insulation, roofing shingles, asphalt pavement, glass, plastics, etc." (Biocycle July/90 p.57).*

Some of the materials found in C & D debris originate from many sources. The following list is an example of such debris and their sources:

Waste Type	Source
Rubble	Dirt, bricks, cinder blocks, concrete
Asphalt	Roads, bridges, parking lots
Tar-based materials	Shingles, tar paper
Ferrous metal	Pipes, roofing, flashing, steel
Non-ferrous metal	Aluminum, copper, brass, stainless steel
Untreated wood	Framing, scraps
Treated wood	Plywood, pressure-treated, creosote-treated
Glass	Windows, doors
Plastic	Vinyl siding, doors, windows

Many new end-use markets can be created by source separating these materials and re-introducing them into mainstream industries. The chart below is an example of some end-use markets:

Waste Type	End-use
Dirt	Soil, soil conditioner, landscaping, landfill cover
Bricks	Masonry, landscaping, ornamental stone
Concrete, rocks	Fill, roadbeds
Tar-based materials	Mixed with asphalt for resurfacing
Ferrous & non-ferrous metal	Scrap metal buyers
Glass, plaster	Aggregate fill, asphalt
Wood	Fuel, landscaping, compost bulking agent, animal bedding, building products
Cardboard	Fuel pellets

* (Resource Recycling Dec./90 p.66 & 67)

COMPANY INFORMATION	SERVICES	MARCH 1995
AAROC AGGREGATES AND RECYCLING LTD. 95 Exeter Road London, Ontario N6L 1B6 Paul Aarts, Leigh McIndoe (519)652-2104 Fax: (519)652-9095	Accepts construction and demolition debris including concrete, asphalt, shingles, wood and drywall for recycling. On-site crushing of demolition materials. On-site stump grinding & removal. Call for details	
B.E. SMITH ENTERPRISES 675 Jerseyville Road West Jerseyville, Ontario L0R 1R0 Brian Smith (905)648-3550 Fax:	Landfill site accepts inert materials only - concrete, rock, brick, clean fill; must be delivered to pit; no minimum/maximum	
CANADIAN EAGLE RECYCLERS INC. 8100 Woodbine Avenue Markham, Ontario L3T 5H5 Marc Mittleman (905)792-2209 Fax: (905)458-4149	Operates a mobile crusher & screening plant for on-site recycling of rubble/concrete and brick; can provide mobile wood grinding service and magnetic separation; also accepts asbestos, broadloom, metal scrap and drywall for recycling	
CONNOR MANAGEMENT SERVICES INC. 4151 Morris Drive, Suite 4 Burlington, Ontario L7L 5L5 Scott Connor (905)637-1179 Fax: (905)634-0554	Will arrange for pick-up and disposal/recycling of asphalt and concrete; roll-off, lugger or dump trailer

Commercial food wastes are generated by retail outlets, hotels, restaurants, airlines, institutions, and food manufacturing and distribution companies. Food wastes can be in the form of trim from produce, flower cuttings, baked goods, deli materials, dairy or frozen products, and prepared meats.

Food that is safe and still suitable for human consumption, but cannot be sold for marketing reasons, can be donated to social agencies such as food banks or hostels. Export to foreign countries as food relief is also an option. Food wastes that are not suitable for human consumption can be diverted from landfill in a number of ways: farmers may use this food for animal feed or agricultural land use.

Composting is an alternative for industrial, commercial and institutional food wastes as well as domestic kitchens, and leaf and yard materials. Restaurant or food processing grease trap wastes may composted or otherwise treated to be used as a soil amendment.

Food and vegetable oils are recycled into products such as soap and animal feed. Certain parts of fish, meat and fowl are considered delicacies and may find a market elsewhere in the world.

The recycling of container glass products is quickly becoming an integral part of the glass manufacturing industry. Glass containers are virtually 100 percent recyclable where new glass containers can be made from old ones over and over again. Other glass types such as automotive, laminated glass, etc., currently have limited re-use, but may generate new opportunities for the future.

Manufacturers can acquire glass products to make new ones as containers for food, beverages, perfume, cosmetics, medicine and other consumer goods. The glass recycling process begins with the collection of used bottles and other containers. The glass is crushed into small pieces called cullet. The cullet is then mixed with melted glass, soda ash and limestone to produce new glass. Glass manufacturers can use as much as 25 percent cullet in their process, saving energy, landfill space and most importantly natural resources.

A major concern for glass recyclers and manufacturers is contamination. Common contaminants include: ceramics, china (eg. tiles, cups, plates, vases), windows, mirrors, drinking glasses, crystal, laboratory glass, cookware and light bulbs. These contaminants have different physical or chemical properties and should not be mixed with container glass.

Glass recycling is finding a place with end-use markets beyond the container industry. Such examples are asphalt aggregates in place of sand in concrete (eg. glasphalt) and fiberglass insulation.

Ferrous and non-ferrous metals are reusable and recyclable materials. Factories and mills that produce metal that is put back into their process is called "home scrap." Goods made of metal that is discarded is called "obsolete scrap." Examples are old cars, railroad tracks, appliances, farm equipment and steel beams.

Steel is the most recycled material in Canada. All steel products are 100% recyclable and can be recycled indefinitely. For instance a car can be recycled into steel for use in a bridge, then the bridge can be recycled to make stoves, and then stoves into food and drink cans.

Steel food and beverage cans are 100% recyclable and implementation of a collection program in the work place easily recovers this valuable resource. Steel cans are made of steel with a protective tin coating. Recyclers are encouraged to densify cans for efficient and economical shipment.

Aluminum is 100% recyclable. Aluminum cans, T.V. dinner trays, pie plates, oven roasters, oven liners and household foil are all recyclable. Aerosol cans, aluminum tubes, wrap, cigarette foil, chip bags, yogurt lids and juice boxes are not recyclable.

COMPANY INFORMATION	SERVICES	MARCH 1995

SALVAGE METAL SERVICES 130 Healey Road Bolton, Ontario L7E 5B2 Roy Craig (905)857-7775 Fax: (905)857-0781	Accepts vehicle batteries; will pick up; fee may apply; minimum pick-up load; deliveries accepted	
THE BATTERY BROKER 11 Tupper Ave. Etobicoke, Ontario M8Z 5H5 Ron Bebee, Vince Ditta (416)255-3321 Fax: (416)255-7707	Accepts lead-acid, lithium, alkaline, mercury, silver oxide, magnesium, nickel/cadmium, and other batteries; call for material handling and other information; will pick up or receive at facility	
THE BATTERY MAN 1059 Janette Ave. Windsor, Ontario N9A 5A4 Ray McCrae, Jack Merritt (519)253-5544 Fax: (519)977-8734	Accepts lead-acid batteries; deliveries accepted - may pay; will pick up; materials may be loose	
TONOLLI CANADA LTD. 1333 Tonolli Rd. Mississauga, Ontario L4Y 4C2 Adilson Manequini (905)279-9555 Fax: (905)896-3415	Accepts lead-acid batteries, lead sludge, lead drosses and lead plates; 40,000 lbs. minimum quantity - will pick up; no containers	

OILS/COOLANTS

Waste oils may have been used as lubricants, heat dissipating, anti-rust agents or in hydraulic systems. As a lubricant oil reduces friction and prevents wear. With heat dissipation oil cools parts and also reduces rust. Used motor oil comes from car service centers, maintenance facilities, military installations, industrial plants, farm equipment, and do-it-yourself oil changers.

Used motor oil may be classified as liquid industrial or hazardous waste. Hazardous oil waste can contain contaminants such as lead, cadmium, chromium, arsenic, and barium. Industrial generators, including service facilities, are required under the Ministry of the Environment regulation 347 to manage their used oil.

Used oil is recycled by re-refining. Re-refining motor oil involves the removal of water, light hydrocarbons and the separation of lubricants from heavy oil and metals.

Glycols may be used in cooling or hydraulic applications. Water glycols are used in hydraulic systems where flammability is a concern.

Ethylene or propylene glycol or anti-freeze is the coolant normally used for car engine cooling. Motor vehicle anti-freeze can be recycled on-site with units which return the filtered anti-freeze to the vehicle's cooling system.

Alternately, glycols/anti-freeze can be recycled off-site at larger reclaiming centres.

COMPANY INFORMATION	SERVICES	MARCH 1995
AER-O-FLO ENVIRONMENTAL INC. 1175 Appleby Line, Unit B2 Burlington, Ontario L7L 5H9 Roy Budd, P. Eng. (905)335-8944 Fax: (905)335-8972	Manufactures for and supplies to industry, oil separation and recycling equipment	
AIMCO SOLREC LIMITED 425 Morobel Drive Milton, Ontario L9T 4N6 George Kopulos (905)878-2627 Fax: (905)878-4728	Accepts oily wastes (no PCBs) for waste fuel blending.	
ANACHEMIA SOLVENTS LIMITED 3549 Mavis Rd. Mississauga, Ontario L5C 1T7 Russ Poppe, Glenn Webber (416)279-5122 Fax: (416)279-4130	Accepts waste crankcase and lubricating oils; containers provided upon request; pick up service; no drop-offs	
ARDEE RECYCLING INC. 89 Research Road Toronto, Ontario M4G 2G8 Robert Durgy (416)422-1888 Fax: (416)422-0092	Will pick up used oil, oily water/sludge for re-refining; 250 gallons minimum; will pick up	
CHEM ECOL LIMITED 640 Victoria Street Cobourg, Ontario K9A 4W4 Brian Milner (800)263-3939 Fax: (905)372-1658	Recycles all industrial oils except motor oil, water solubles, solvents or PCB contaminated oils over 50 ppm; minimum 5 drums

The collection and recycling of paint and solvent waste generally involves a two step process. The first part involves delivery or pickup of the waste product from the household or site to a collection agency. The second step involves segregation and consolidation of paint waste to a recycler or approved disposal site.

Paint is separated into three groups: recyclable latex, recyclable alkyd and non-recyclable products (eg. contaminated paint, unknown paints, stains, epoxies, etc.). Recycled paint is tested for contamination. The useable paint is packaged into 45 gallon drums and sent to be reworked. It then is strained, treated and packaged in 20 litre pails for the market.

Recycled paint is most useful for exterior use, municipalities or large institutions for: exterior wood structures, exterior masonry surfaces, and fences. Paint cans are also recycled into reusable steel.

Waste inks can be reclaimed on or off-site by blending to produce black ink.

Chlorofluorocarbons (CFCs) are used as refrigerants and as solvents in metal cleaning operations. As CFCs have been identified as major contributors to the depletion of the stratospheric ozone layer, legislation prevents the release of CFCs to the atmosphere. CFCs can be recycled onsite from refrigeration systems and motor vehicle air conditioners.

PAPER

Paper products are processed from plant fibres of softwood and hardwood trees, shrubs, grasses and vegetable material. Commercial paper is made by either chemical or mechanical processes. High quality paper is produced by the chemical process and lower grade papers are made by the mechanical process. The major paper types include: fine paper, newsprint, magazine, corrugated containerboard, paperboard, industrial, household and specialty papers.

Newsprint is being recycled from old newspapers and is finding greater use in the newspaper publishing business. Magazines can be reused by schools, libraries, offices and other institutions before going back into the manufacturing process for recycling.

Corrugated cardboard is described as linerboards enveloping a corrugated medium (the fluting of middle layer). If it is in good condition then it may find use as shipping material. Damaged cardboard can be recycled into kraft paper for bags, cardboard containers, packaging materials, biodegradable supplies and paper towels.

Fine paper is used primarily in offices, schools and homes. Source separation and sorting is the key to producing good quality recycled paper. Fine paper can be recycled as 100% post-consumer paper.

COMPANY INFORMATION	SERVICES	MARCH 1995

Plastic is a synthetic material composed of carbon and hydrogen molecules. These molecules are tightly bound making plastic difficult to decompose. There are over thirty different types of plastics. The most common are polyethylene terepthalate (PET), used in soft drink bottles; high density polyethylene (HDPE) used for milk and juice jugs, shampoo bottles and motor oil containers; low density polyethylene (LDPE) used for grocery bags; polyvinyl chloride (PVC) used to make vegetable oil bottles; polypropylene (PP) used for margarine and yogurt tubs and polystyrene (PS) for styrofoam.

The Society of Plastics Institute (SPI) of Canada developed a coding system for plastics:

1 - PET	2 - HDPE	3 - PVC	4 - LPDE	5 - PP
6 - PS	7 - Other			

It is estimated that eighty-five percent of all plastic bottles are made from HDPE and PET. HDPE plastics can be reprocessed into pellets for bottle and sheet products. PET is being used in fiberglass, jackets, pillows, twine, rope, carpets and electrical parts.

The efficiency of recycling plastic can be increased if containers are rinsed and bottles with hazardous material labelled, segregated and disposed of in a registered hazardous waste landfill site.

Wood waste can be acquired from several sources. Forestry sectors produce sawdust, end-cuts, chips, pallets and skids. Construction and demolition debris is a source for framing, lumber, end-cuts, plywood, particleboard, moulding and scraps. Other wastes include tree branches, brush, hydro poles, Christmas trees and railway material.

Waste wood that is found in good condition can be reused in building projects. Wood pallets can be repaired for reuse. Contaminants such as paints, varnishes or laminated surfaces may make the wood unacceptable for recycling. Acceptability depends on the process, its capability to remove contaminants and end-use markets.

Other uses of wood waste include chips or shavings for landscaping, animal feed, particleboard production, roofing materials and charcoal briquettes.

Textiles that can be considered reusable are clothing, upholstery, linens and towels. Most textiles are found to be either reusable or recyclable. Social organizations recover textiles through drop-bins and pickup services.

Used clothing comprises forty percent of collected textiles. These textiles are usually repaired, cleaned and redistributed to needy organizations locally and internationally. Paper, yarn and padding can be made from textile. Paper made from rag bond is used for printing and writing; wool can be rewoven and rag fibre can be used for padding, carpet and auto interiors. Rags have many uses in industry for machinery cleaning and spills.

As computer technology has evolved, the number of obsolete computers requiring disposal has increased. The value of computer components has made component recovery and recycling a viable alternative to landfilling.

The typical computer contains both base and precious metals and plastics or combinations of these materials. Computers are dismantled with certain components separated for reuse and the remaining plastics and metals separated for recycling.

BROFIELD GROUP P.O. Box 42015 Mississauga, Ontario L5M 4Z4 James H. Dutfield (905)821-0140 Fax: (905)542-3816	Distributor of compactors, balers, horizontal and vertical grinders, shredders and crushers	
COMPLETE RECYCLING SYSTEMS 47 Morton Avenue Brantford, Ontario Maurice Deschamps (519)758-9459 Fax: (519)758-9460	Manufactures complete recycling equipment systems - phone for details.	
ENERGETEX ENGINEERING P.O. Box 40083 Waterloo, Ontario N2J 4V1 Ed Twardus, President (519)886-2672 Fax: (519)885-2738	Consulting, engineering and equipment manufacturer/sales of "Cleanfire" portable incinerators and portable burners which burn waste oil.	
ENVISION RECYCLING P.O. Box 9, Depot 1 Hamilton, Ontario L8L 7T5 Leo Gervais, Valerie Carson (905)627-3600 Fax: (905)627-4522	Supplier of recycling equipment and supplies including balers	
ERIEZ OF CANADA LIMITED 200 Admiral Blvd. Mississauga, Ontario L5T 2N6 Robert Gatt (905)795-0444 Fax: (905)795-0450	Manufactures and distributes magnetic separation equipment and vibratory feeders.	

COMPANY INFORMATION	SERVICES	MARCH 1995
FABRICATED PLASTICS LTD. 2175 Teston Road Maple, Ontario L6A 1T3 Joe Penariol, Purchasing Agent (905)832-8161 Fax: (905)832-2111	Manufactures fiberglass storage tanks for corrosion industry	
RAM-PAK COMPACTION SYSTEMS LIMITED 2410 Lucknow Dr., Unit #31 Mississauga, Ontario L5S 1V1 Peter Conforti, V.P., Ops. (905)612-8720 Fax: (905)612-8723	Distributes compactors, balers, extruders and de-watering equipment.	
RECOVERY TECHNOLOGIES INCORPORATED 5925 Airport Road Mississauga, Ontario L4V 1W1 Gary Mottershead, President (905)672-9448 Fax: (905)673-8538	Supplier/manufacturer of tire recycling equipment.	
SPROULE PLASTICS EQUIPMENT Paul Sproule, Rosanne Sproule (905)542-7444 Fax: (905)542-7445	Manufactures shredders and magnetic separators	
STORMCEPTOR 195 The West Mall Etobicoke, Ontario M9C 5K1 Joe Monteith, Scott Monteith (416)626-0840 Fax: (416)626-8710	Manufactures/distributes "Stormceptor System" interceptor designed to remove grit/oil from storm/industrial waste waters; oil & grease interceptors for service stations/restaurants	

COMPANY INFORMATION	SERVICES	MARCH 1995
THERMAL ENERGY INTERNATIONAL INC. 36 Bentley Ave., 2nd Floor Nepean, Ontario K2E 6T8 Thomas Hinke, Wayne Littleford (613)723-6776 Fax: (613)723-7286	Manufacturer of "FLU-ACE" heat recovery and pollution control systems; provides related consulting services	
TOMRA SYSTEMS INCORPORATED 6725 Millcreek Dr., Unit #5 Mississauga, Ontario L5N 5V3 Ralph Zarins, Service Manager (905)567-8016 Fax: (905)567-9498	Distributes automated used beverage container machines, i.e. glass counting system for deposit returns; also machines for cans and PET - reduces volume of containers.	

The following is a list of government agencies and organizations that can be contacted to assist you with your waste management needs:

ASSOCIATION OF MUNICIPAL RECYCLING COORDINATORS (AMRC)
25 Douglas Street
Guelph, Ontario
N1H 2S7
(519)823-1990 Fax:(519)823-0084

The AMRC is an incorporated non-profit organization formed in 1987 by municipal waste professionals to facilitate the sharing of municipal waste reduction and recycling information and experience among municipalities.

BUSINESS ADVISORY CENTRE (BAC)
OF HAMILTON-WENTWORTH
7 Innovation Drive, Suite 100
Hamilton, Ontario
L9J 1K3
(905)689-2400 Fax: (905)689-2200

The BAC is a "not for profit organization", funded by the Regional Municipality of Hamilton-Wentworth and the Ontario Ministry of Industry, Trade and Technology, which provides advice to small business to help improve management, technical and marketing practices,etc., and free information and counselling on starting a small business and low cost seminars on business start-up, planning and marketing/sales.

HAMILTON PUBLIC LIBRARY
55 York Boulevard
Box 2700, Station A
Hamilton, Ontario
L8N 4E4
(905)546-3200

The Hamilton Public Library provides information on the environment to consumers, businesses, manufacturers, and the general public. The Central Library's Business Science, Technology and Government Documents Department is the hub of its environment service, including popular, "how to", legal, government, scientific, and technical issues. Books, journals, videos, and computerized information are available.

MINISTRY OF AGRICULTURE AND FOOD
RR#1, 617 Hwy #53 East
Ancaster, Ontario
(905)527-2995

The goal of the Ministry of Agriculture and Food is to encourage the efficient and dynamic development of the total agriculture and food sector for the well-being of all people of Ontario. The Ministry's programs include marketing, quality standards, foodland preservation and improvement, education and research, advisory and technical services to farmers, as well as farm financial assistance.

MINISTRY OF THE ENVIRONMENT & ENERGY (MOEE)

West Central Region
119 King Street West
P.O. Box 2112
12th Floor
Hamilton, Ontario
L8N 3Z9
(905)521-7640 Fax: (905)521-1601

Waste Reduction Branch
40 St. Clair Avenue West
7th Floor
Toronto, Ontario
M4V 1M2
(416)325-4440 Fax: (416)325-4437

The Ministry is responsible for achieving and maintaining a quality of the environment, including air, water and land, that will protect human health and the ecosystem and will contribute to the well-being of the people of Ontario. By enacting and enforcing legislation such as the Environmental Protection Act (i.e. Regulation 347) the Ministry is able to maintain and monitor the state of the environment.

OMMRI - CORPORATIONS IN SUPPORT OF RECYCLING
26 Wellington Street East, Suite 601
Toronto, Ontario
M5E 1S2
(416)594-3456 Fax: (416)594-3463

OMMRI assists the private sector in reducing the amount of garbage disposed of in Ontario. OMMRI members are helping to achieve a reduction in Ontario's municipal waste stream through practices which encourage recyclability and recycled content. The corporation is primarily involved with blue box programs and has limited participation in ICI activities.

ONTARIO WASTE EXCHANGE (OWE)
CANADIAN WASTE MATERIALS EXCHANGE (CWME)
c/o Ortech International
2395 Speakman Drive
Mississauga, Ontario
L5K 1B3
(905)822-4111 Fax: (905)823-1446

The OWE and CWE assist the IC&I Sectors to find technologies and guidelines to minimize waste, users for waste (waste exchange) and recyclers for waste. The OWE is a joint project of the Ontario Ministry of the Environment and Energy (MOEE), the Ontario Waste Management Corporation (OWMC) and ORTECH Corporation. OWE works in cooperation with the Canadian Waste Materials Exchange to help industries find practical ways to manage their wastes and save money.

ONTARIO WASTE MANAGEMENT ASSOCIATION (OWMA)
4195 Dundas Street West, Suite 320
Etobicoke, Ontario
M8X 1Y4
(416)236-0172 Fax: (416)236-0174

The OWMA actively promotes the continued development of a strong private waste management industry which plays an integral role in safeguarding the public interest and achieving Ontario's environmental objectives in the most efficient and effective manner. OWMA member companies carry out this role by providing a full range of professional and environmental services and facilities in waste management and material recovery.

ONTARIO WASTE MANAGEMENT CORPORATION (OWMC)
2 Bloor Street West, 11th Floor
Toronto, Ontario
M4W 3E2
(416)923-2918 Fax: (416)923-7521
1-800-268-1178

The (OWMC) is a provincial Crown agency mandated to reduce, treat and dispose of hazardous waste. OWMC was created in 1981 to ensure that the public interest is protected against the short and long-term effects of hazardous wastes.

RECYCLING COUNCIL OF ONTARIO (RCO)
489 College Street, Suite 504
Toronto, Ontario
M6G 1A5
(416)960-1025 Fax: (416)960-8053
1(800)263-2849

The RCO is a non-profit organization comprised of multi-stakeholders, founded in 1978. The RCO provides a number of services including: advocating the conserver society ethic, increase public adoption of 3Rs, develop new recycling systems, perform technical research leading to practical solutions, provide educational material to schools, provide council to government, industry and specific interest groups and facilitate dialogue between diverse segments of society.

REGIONAL MUNICIPALITY OF HAMILTON-WENTWORTH
Environmental Services Department, Waste Management Division, Industrial Waste Section
35 King Street East, 4th Floor
Park Place
Hamilton, Ontario
L8N 4A9
(905)546-4417 Fax: (416)546-4494

The Environmental Services Department, Waste Management Division is responsible for the planning and administration of the Region's waste management program including recycling, incineration, landfill operations and the administration of Sewer Use Control By-Laws.

THE COMPOSTING COUNCIL OF CANADA (CCC)
275 MacLaren Street, Suite 3-Q
Ottawa, Ontario
K2P 0L9
(613)238-4014 Fax:(613)230-4143

The CCC serves as a forum for those committed to discovering lasting solutions in waste management to work together to advance composting as a safe and effective method for recovery and reusing organic waste. The council is a multi-stakeholder organization and has four regional committees, including one in Ontario.

Baler - A machine that compacts waste materials into bundles to reduce volume and retains them in this compacted form to reduce transportation costs.

Biodegradation - A natural process involving the assimilation or consumption of a material by living micro-organisms.

Biodegradable Material- Waste materials capable of being broken down by bacterial or microbe action.

Bottom Ash - The residue which remains at the bottom of an incinerator after waste is burned. It can be used in building materials such as concrete and road beds.

British Thermal Unit (BTU) - The unit of heat required to raise the temperature of one pound of water by one degree Fahrenheit. In resource recovery systems, BTU indicates the amount of heat energy produced from burning a given amount of waste.

Buy-Back Centres & Programs - Facilities or programs where individuals return recyclable materials to processors for payment.

Classification/ Sortation-
Sorting of materials into uniform categories or classes, such as plastics, glass, aluminum, steel and paper, as part of the recycling process.

Coding - In the context of waste, coding refers to a system used to identify recyclable materials. The coding system for plastic packaging, a mobius loop with a number in the centre and letters underneath, indicates the resin from which each container is made. The code is moulded into the bottom of the bottles to help recycling sorters identify the different resins.

Collection - The act of picking up waste materials at home, businesses or industrial sites and hauling them to a recycling facility, energy recovery plant, or a landfill.

Collection Centre - A facility where secondary material is collected, usually from the public, and then resold to brokers or manufacturers for recycling.

Commingled Plastics - A mixture of two or more different types of plastic materials. Technology now exists to recycle commingled plastics into useful products.

Compactor - Power-driven mechanical equipment that densifies (compresses and reduces the volume of) waste materials. Compactors, which are often installed on residential and commercial refuse trucks, contain material under pressure and will not allow it to expand until it's unloaded.

Composting - A process through which organic waste materials are reduced to humus through biodegradation.

Certificate of Approval (C of A) - A legal document which is required for the operation of any waste management facility under the Ontario Environmental Protection Act.

Contaminant - Foreign material that makes a primary material impure and reduces or eliminates its recycling value.

Cover Material - A backfill, usually dirt or ash and free of organic matter, used to cover compacted waste in a sanitary landfill. If there is insufficient soil cover available, then plastic foam sprays can be applied in some locations.

Cullet - Broken glass that can be remelted into new glass products.

Curbside Pickup/Collection- Selected recycling materials are collected at the curb, usually from specially designated bins (i.e. blue boxes), for distribution to appropriate processing facilities.

Degradable Plastics - Plastics specifically developed or formulated to break down after exposure to sunlight or microbes. For example, beverage pack rings are now made from photodegradable plastic. Self-dissolving surgical sutures have also been developed to biodegrade within the body.

Deposit/Returns - Established in various parts of Canada to help reduce litter. A deposit is paid when purchasing items such as beverages and then is refunded when the containers are returned.

Disposal - The final disposition of wastes, either through incineration or landfilling.

Drop-off Recycling Centres - Facilities, often unattended bins, where individuals can deposit recyclable materials such as plastics, metals, glass and newspapers.

Dump - An open, unmanaged site where garbage is buried or left to decompose. Many dumps, now closed because of environmental problems, have been replaced with modern sanitary landfills.

Energy From Waste (EFW) - The concept of burning waste in an incinerator and using the released energy to make steam or to generate electricity which could be used in a variety of ways (eg. to heat buildings).

Energy Recovery-The recovery of energy from a combustion process in useable forms such as heat or electricity.

Environment-The Earth and its atmosphere; sometimes called the biosphere.

Fly Ash- Non-combustible particulates generated when burning waste materials. Modern incinerators are equipped to capture fly ash and prevent it from entering the atmosphere. Fly ash is often toxic and causes disposal problems (eg. due to incomplete combustion).

Groundwater - Water which exists in underground passageways in rocks and which flows in response to gravity; often the source of water for communities.

Heavy Metals - A group of metals including aluminum, zinc, chromium, nickel, copper, tin, silver, antimony, cadmium, arsenic, lead, mercury, iron, and cobalt. These materials, due to their persistence in the environment, tend to contaminate the ecosystems's food web. Heavy metals are often present in the fly ash of incinerators and the leachate from landfill sites.

Humus - Nutrient-rich material resulting from the natural decay of organic material in the soil; similar to compost.

Incinerator - A plant designed to reduce waste volume through combustion. Modern incinerators recover energy from the combusted waste.

Incinerator Ash - The post combustion residue. Bottom ash is removed through a bottom grate and fly ash is removed in the air pollution control equipment (typically an electrostatic precipitator or a bag-house filter system).

Landfill - Land used for disposal of waste (see sanitary landfill).

Leachate - The liquid which results when rain or melting snow percolates through a material and carries with it dissolved materials picked up as it moves. Depending on the location, leachate may contain hazardous materials which could contaminate groundwater or surface water. Leachate contains more heavy metals if the rain or snow is acidic.

Litter - Waste that has not been properly disposed of, either by placing it in a place or container specifically designed for that purpose, or recycling it.

Manual Separation- Separation of waste materials by hand, either in the home or office, or in a waste recovery plant. (Also known as hand sorting).

Materials Recovery - A process of waste handling that separates out reusable and recyclable materials such as plastics, metals, glass, and certain grades of paper.

Methane - A naturally occurring gas produced when organic material biodegrades without the presence of sufficient oxygen. It is often mixed with other gases. Because methane is foul, flammable and can migrate through soil, it can cause problems at landfill sites or in the surrounding area. It can be collected and used for the generation of heat and electricity.

Mobius Loop - The Mobius Loop symbolizes the endless use and reuse of materials. The three arrows refer to solids, liquids and gases; the three kinds of recyclable materials. Named after August Mobius, a German mathematician who died in 1868.

Municipal Solid Waste (MSW) - More commonly referred to as garbage, this waste material is handled by municipal collection and/or disposal services. It includes two main types of solid waste: residential waste and industrial, commercial and institutional waste. Municipal solid waste does not include hazardous and liquid

industrial waste. Also known as garbage, refuse, rubbish and trash. Different municipalities make legal distinctions among these terms, but they are all forms of municipal solid waste.

Packaging Materials- Any of a variety of plastics, papers, cardboard, metals, ceramics, glass, wood and paperboard used to make containers for foods, household and industrial products.

Plastics - A very large number of different, synthetic, organic compounds, usually made from products of oil/petroleum industry. Different plastics have a great variety of properties and, thus, have many kinds of applications. Because there are so many kinds of plastics, it is often difficult to include them in community recycling programs.

Primary Material - Virgin or new material used for manufacturing basic products.

Reclamation - The process of restoring materials found in the waste stream to usefulness or productivity. Reclaimed materials may be used for purposes other than their original use.

Recycling - Physically, chemically or biologically reprocessing solid or liquid waste in order to use the material to make a new product. A recycling program involves much more than just the actual reprocessing. It involves also the continuous separation, collection and/or cleaning of the recyclable materials and the maintenance of stable markets for the recyclable materials and useful final end-products.

Resource Recovery - Any process that extracts value from collected waste. eg. recycling or burning as a fuel to generate energy.

Resource Recovery Facility - Also called an energy recovery or energy from waste plant. A facility where solid waste is converted into some form of usable energy or fuel.

Sanitary Landfill - A method of waste disposal designed to reduce hazards to human safety and the environment. For environmental reasons many sanitary landfills are equipped with heavy plastic liners, leachate collection systems and gas capture/venting systems. Sanitary landfills can be reclaimed after reaching their waste capacity for recreation and parklands.

Separation - Division of waste into groups of similar materials, either manually or mechanically with specialized equipment. Recycled plastic packaging has been coded to make the separation process easier (see coding).

Single Service Packaging - Materials manufactured for a single use, such as foam plastic or paper cups used in food service establishments and health care centres.

Source Reduction - A way of reducing waste byproducts by using less material or fewer materials in the manufacture of products.

Source Separation - The purposeful

segregation of used materials from municipal waste into specific material categories at the point of generation, or where the waste is created. The generator may separate recyclables from other waste, but further sorting may be required. Some municipalities further sort recyclables into separate compartments in the collecting trucks; others co-mingle the recyclables for sorting at another location.

Tipping Fee - The cost charged to dispose of waste at the disposal area such as a landfill or waste-to-energy facility. Usually stated in dollars-per-tonne.

Transfer Station - A facility where waste is moved from smaller collection vehicles into larger, more cost-effective transportation units like railroad cars, barges or truck trailers.

Virgin Materials - Any basic (raw) material for industrial processing which has not been previously used.

Volume Reduction - The processing of waste materials to decrease the amount of space they occupy, usually by crushing, shredding, incineration or composting.

Waste Management - The entire process of collecting, sorting processing, recycling, reclaiming and disposing of waste.

SOME COMMONLY USED ABBREVIATIONS

C of A	Certificate of Approval
EFW	Energy From Waste
EA	Environmental Assessment
EAA	Environmental Assessment Act
EPA	Environmental Protection Act
HHW	Household Hazardous Waste
ICI	Industrial, Commercial and Institutional
MRF	Material Recovery Facility
MSW	Municipal Solid Waste
NIMBY	"Not In My Backyard"
OCC	Old Corrugated Cardboard
ONP	Old Newsprint
PAH	Polycyclic Aromatic Hydrocarbons
PCB	Polychlorinated Biphenyl
PET	Polyethylene Terepthalate
PS	Polystyrene
3RS	Reduce, Reuse, Recycle
RDF	Refuse-Derived Fuel
